Operable Unit No. 1 French Drain IM/TRA Shutdown

J.M. Kersh, Associate General Manager  
Environmental Restoration and Waste Management  
EG&G Rocky Flats, Inc.

This is to confirm and clarify verbal instructions given to your staff to cease activities at the 881 Hillside French Drain Interim Measure/Interim Remedial Action site that involves workers or personnel entering the excavation of the french drain. Due to the slump/slippage of earth material from the side of the drain excavation, we gave verbal instructions on Wednesday December 18, 1991 at approximately 1:30pm to cease all french drain construction activities. At the 2:00pm meeting with the project staff, we gave verbal instructions that backfilling of the excavation in the area west of the slump/slip is allowed to render the existing slump/slip safe. Also allowed is continuation of the work in the far eastern end of the drain where final grade is almost completed. Although some activities were authorized, there is no authorization for workers or personnel to enter the french drain excavation until such time that acceptable procedures are written and approved by appropriate EG&G organizations and found to be acceptable to DOE.

Questions may be directed to Scott Grace of my staff at extension 7199.
